

Wind Academy by Siemens Gamesa

A Florida state-certified technical school offering an accelerated Wind Energy Basic Technician certificate.

Siemens Gamesa Renewable Energy is a Global Wind Organization (GWO) certified training provider. Through our Wind Academy, a State of Florida certified technical school, we offer a three-week accelerated Wind Energy Basic Technician certificate. This certificate prepares a technician to work supervised performing scheduled maintenance and assisting in minor component replacements, retrofits and troubleshooting tasks.

With over 160 years of industrial experience, Siemens Gamesa has a long tradition of training on a global scale and has made significant investments in its facilities to develop its in-house learning capabilities. Opened in 2013, our main training center for the Americas is located in Orlando, FL. The training center is outfitted with both the tools and technology to support our curriculum, including classrooms, nacelles, climbing towers, electrical equipment and a variety of simulation experiences.

Key facility features include:

- 40,000 square-feet
- Accredited by Global Wind Organization (GWO) for safety and technical training
- Full size nacelles inside the training center
- 30-foot climbing towers, ladder structures, electrical and hydraulic modules, and maintenance crane, safety and rescue simulations
- Built according to the U.S. LEED gold building standards
- \$7 million investment

Wind Energy Basic Technician certificate program

- 3 Week program
- Small class sizes (1:6)
- Job placement assistance
- Affordable, competitive pricing
